1. Converts equation editor is limited to factor conversions such as feet to inches. It will not handle more complex conversions such as celsius to fahrenheit. Also, Convert allows up to 20 custom equations, while Converter will handle an unlimited number of complex custom equations.
2. Requires the setup to be run first, then the program folder can be copied to another directory, uninstalled, and used stand-alone.
3. ESBUnitConv options / preferences are stored in the Application Data folder in the system directory.
4. Quad-Lock options / preferences are stored in the Windows folder.
5. NumericalChameleon options / preferences are stored in Documents and Settings.
6. pmaCalc costs \$15 for commercial users. "Freeware for no commercial usage!"
7. "FREWARE for personal, non-commercial use."
